

NEW IDPH GUIDANCE

According to the Hancock County Health Department, the Illinois Department of Public Health has issued new guidelines pertaining to temperature checks and screenings at school. Therefore, beginning Monday, March 1, 2021, the following guidelines will apply:

1. We will no longer be screening students with a temperature check on arrival or as they enter the bus.
2. Parents are required to screen their children at home before sending them to school.
3. Do not send students to school who have symptoms.
4. We will spot-check random students on a daily basis.
5. Students who have symptoms will still be sent home. IDPH's new guidance does not change this.
